Commented [CG1]: How to use this template:
 1. Review all the substances and find the ones that apply to the part list.
 2. Remove the ones that don't apply.
 3. Review the Exposure Rate column and decide if the substance can be transmitted.
 4. Usually if internal or internally bound, then NO.
 5. If substance is external, then YES and most likely by all three routes: probably Oral, Inhalation, and Touch
 6. When complete, change all red fonts to black.

The signature below verifies that the statements above, and those made in any material composition data, are valid and accurate to the best of our knowledge.
